NEW! Now even faster: Quicker loading times, enhanced performance and improved output options!

Our developers worked hard at making the new version even faster and more efficient, and they were successful! The AVCHD file import feature has been improved and is now **more than 40% faster***.

Rendering test projects (AVCHD Full HD) with Intel® Quick Sync Video, AMD®/OpenCL™ or NVIDIA® CUDA™ for the Apple iPad is now **up to twice as fast** in Movie Edit Pro 2013*.

NEW! After activating hardware acceleration your graphics card will be automatically recognized by Movie Edit Pro 2013.

Calculating effects directly on the graphic card's GPU is now **over 90%* faster**, the biggest speed boost out of all the improvements.

Comparison to the previous version

Comparison test vs competition

* compared to the previous version of Movie Edit Pro MX

Note! The test results depend on the system configuration, file size, video format and selected effects.

NEW! New chroma key engine for perfect object extraction

Just like the movies: The new chroma key engine allows you to create impressive video effects in movie quality.

Green screen and blue screen effect: Simply record footage of people or things in front of a plain-colored background and layer new photos or videos just like a green/blue screen.

Add objects and people to movies or create incredible backgrounds, e.g. mountains, underwater or outer space.

NEW! The built-in anti-spill feature immediately creates neat, sharp contours - leaving no green edges.

MAGIX Movie Edit Pro 2013

More information at www.magix.com

NEW! Improved timeline display with video and audio on one track

Complete control: Video and audio from one source are now combined on one track.

This allows you to fit more tracks into the timeline and keep an overview of larger projects with lots of tracks.

Picture and sound can also be split onto their own separate tracks at any time with a simple mouse click.

NEW! Support of the new video standard AVCHD Progressive (50p)

AVCHD Progressive

MAGIX leading the way: MAGIX Movie Edit Pro 2013 is the first video editing software in the consumer sector to support the official new video standard, AVCHD Progressive, for high-definition, progressive AVCHD recordings (50p).

This new technology delivers twice as many fullscreens as before.

The advantage: Objects move more smoothly and the image quality is even more detailed for perfect movies in top quality.

NEW! Fast and direct GPU calculation of all essential video effects

Fast effect preview: In order to guarantee smooth playback Movie Edit Pro 2013 makes use of the enormous computing power of modern graphics cards to calculate all the important video effects.

Effects are calculated directly on the GPU (graphic processor) which decreases the load on the CPU and provides smooth playback when previewing effects.

MAGIX Movie Edit Pro 2013

More information at www.magix.com

NEW! Improved user interface with quick access features

Perfect workflows: The new quick access feature allows you to play and trim video clips directly in the Media Pool and import them directly into your video project's timeline.

This saves time and makes the whole process much more efficient leading to quick results that meet even the highest standards.

Share your videos with the world – upload them to the Internet!

You can now share your movies with friends, family or the whole world even faster: With MAGIX Movie Edit Pro 2013 you can upload your movies directly to social networks and video hosting sites. Your videos are automatically converted to the right format and resolution and uploaded. You can do all of this with just one click if you save your login details in MAGIX Movie Edit Pro 2013.

Supported Online Services:

- YouTube
- Vimeo
- Facebook
- MAGIX Online Album

Experience on the go – Transfer videos to mobile devices

With the helpful export wizard in MAGIX Movie Edit Pro 2013 you can export your videos and movies to video players and storage devices quickly and easily.

You can take your movies with you wherever you go! Transfer them to smartphones, mp4 players or tablet PCs automatically in the right format and resolution.

It's also perfect for your home theater: Export your movies easily to SD cards, external hard drives and media players and enjoy your masterpieces on your own TV.

Optimized for all Standard Models:

- iPhone, iPad and iPod
- Android Smartphones
- Galaxy Tab
- and many more

Compose your own soundtrack in Music Maker

From director to composer: Use the new "Share" button to export your movie from MAGIX Movie Edit Pro 2013 to MAGIX Music Maker 2013 and easily create a fantastic soundtrack full of atmospheric songs.

The video and audio tracks from the video project are automatically exported in the right format and used to create a new Music Maker project which lets you edit and adjust the soundtrack to fit your movie perfectly. Improved performance and quicker loading times mean you can switch between programs even faster.

Optimize your audio tracks in the Video Sound Cleaning Lab

Perfect sound: Transfer audio tracks to MAGIX Video Sound Cleaning Lab, correct imperfections and optimize sound quality then send the finished audio material back to your Movie Edit Pro project.

The unique audio tools in MAGIX Video Cleaning Lab enable you to edit recordings, add effects or simply clean up speech recordings, plus there's a troubleshooting feature if you need any help.

Perfect for removing:

- Wind noise
- Camera hiss
- Transformer hum
- Distortion

Supported operating systems

- Microsoft® Windows® 8 (32-bit and 64-bit)
- Microsoft® Windows® 7 (32-bit and 64-bit)
- Microsoft® Windows® Vista® (32-bit and 64-bit)
- Microsoft® Windows® XP (32-bit)

Minimum system requirements

All MAGIX programs are developed with user-friendliness in mind so that all the basic features run smoothly and can be fully controlled, even on low-performance computers. Check your operating system's control panel for technical information about your computer.

- **Processor:** Dual core processor with 2.0 GHz
- **RAM:** 1 GB
- **Graphics card:** Onboard graphics card with a minimum screen resolution of 1024 x 768
- **Sound card:** Internal sound card
- **Hard disk memory:** 2 GB free disk space for program installation
- **Optical drive:** DVD drive (only for installation of the box version)

Recommended System Requirements

Some advanced program functions demand more of your computer's processing power. To use these functions fully, your system should at least meet the following recommended requirements. Please refer to your operating system's control panel for technical information on your computer.

System requirements for HD editing

- **Processor:** Intel® Core™ 2 Quad-core processor with 2.83 GHz (Intel® Core™ i7 recommended) or AMD® Quad-core processor with 2.8 GHz
- **RAM:** 4 GB
- **Graphics card:** Dedicated graphics card with 512 MB VRAM or more
- **For accelerated AVCHD output:** NVIDIA® GeForce® 8000 Series and better (CUDA™) or AMD® Radeon™ 5000 Series and better (OpenCL™) or integrated graphics with Intel® Quick Sync Video
- **Sound card:** Multi-channel sound card recommended for surround sound editing
- **Optical drive:** Blu-ray burner for creating your own Blu-ray Discs™

MAGIX Movie Edit Pro 2013
